## What will we eat if ....

The United Nations declared 2014 as the International Year of Family Farming (IYFF) to promote a shift towards a more equal and balanced development for all.

We produce enough food with modern science and farming methods but where is all the food if it is not on the table of the poor? Is it money issues or is genetic modification to blame? Is family farming the answer to food security?

Come and join us for a for a discussion on sustainable use of plant genetic resources.

**6 August 2014**

**17h30 for 18h00 – 20h00**
